Due to the time and material needed to sanitize and set up before and following treatments because of the Covid issue, the minimum appointment will be the ¼ hour regardless of time used. This will revert back to allowing 5 and 10 minute treatments when the Covid is no longer an issue.

Rest assured, we adhere to the latest in sterilization and sanitation including everything possibly available to protect us from the Covid-19 as outlined by the CDC and State of Massachusetts.

Our equipment is of cutting edge technology and has proven to achieve permanent results in fewer treatments and with more comfort. For your protection and comfort we use only pre-sterilized and disposable GOLD or INSULATED probes.
